Locking your Social Media

Overview

- Locking down your FB profile
- How to see what Google has on you
- How to see what Facebook has on you

Locking down your profile

- Settings<Privacy<Who can see your future posts?
  - If it's on "Public", anyone can see. You can change it to "Friends" so only your friends can see your posts.
  - Even if you have your account set to private, your old posts may still be public
- How to change this?
  - Under "Who can see my stuff?" look for "Limit the audience for posts you've shared with friends of friends or Public" then click the "Limit Past Posts" link.

- How to hide your age?
  - Edit Profile<About<Contact and Basic Info<Basic Information<Date of Birth
    - Click edit and Choose between Public, Friends, Friends except acquaintances, Only me and Custom.
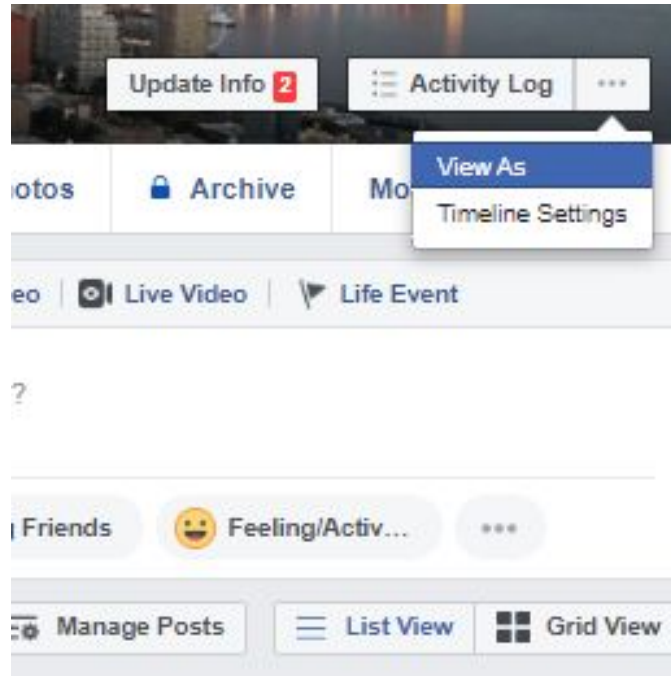

View As feature

How to download a copy of everything Facebook knows about you

- Facebook keeps information on you that goes all the way back to when you first started using it.

- You can download this information if you want to see what Facebook knows or if you just want to leave social media and take your history with you.

  - Go to Facebook.com/settings

  - Tap "Download a copy of your Facebook data."

  - Tap "Download Archive." (It might take a few minutes, but Facebook will alert you when your archive is ready.)

  - When it is, click "Download Archive" again, and a zip file will download to your computer.

  - Browse through that archive by opening each file inside the folder.

How to download a copy of everything Google knows about you

- Google allows its users to download a copy of everything they have stored on the company's services, including Drive, Calendar, Gmail and Hangouts.
- You can download your own archive of this information from Google.
    - Every single place you've searched in Google Maps.
    - The apps you've opened on Android down to the exact second it was opened.
    - Everything I've asked Google Assistant.
    - Every comment you've left on YouTube and every video you've watched.
    - Every Android app you've searched for or downloaded.
    - Every news article you've read on Google News.
    - Ads viewed or visited in any of Google's products.

- Go to http://takeout.google.com/settings/takeout
- Select the products that you want to back up.
- Click 'Next' at the bottom of the page.
- Choose the file format
- Choose your delivery method.
- Tap "Create Archive."
- Be patient. Google warns the archive may take hours or days to create.
